

Instruction to run html file of 360° Virtual Tour

- We can run this 360° Virtual Tour on multiple devices and instruction for all devices are given below,
- For uploading on Online webserver :
 - You have to first extract the zip file.
 - Then upload entire files on an online webserver and then directly open the path of index.html file. (No need of any configuration required)
- For Offline Viewing :
 - Note : If you open the index.html file directly in any browser on any devices - PC/Tablet/Mobile, it will not work because of the security reasons. You need third-party app to run offline(locally) on any device.
 - For Windows PC :
 - You have to first extract the given HTML zip file.
 - Download & Run this tool 'krpano Testing Server (Windows).exe' ([Link](#)),
 - Then drag & drop the index.html file on this tool,
 - After that Virtual Tour will get open automatically in the default browser app.
 - For IOS - MAC (Desktop Only) :
 - You have to first extract the given HTML zip file.
 - Download & Install this package : [Link](#)
 - Search for 'krpano Testing Server' app from Search Bar and open it.
 - Then drag & drop the index.html file on this tool.
 - After that Virtual Tour will get open automatically in the default browser app.
 - For Android Devices (Mobiles & Tablets) :
 - First find & install 3DVista app from the playstore ([Link](#))
 - Then unzip the HTML folder and rename it with the project name.
 - Then manually transfer this folder to this location '
/Android/data/com.tdv.player.tdv/files/3dvista/
 - Then open the app and in the OFFLINE Tab, you can see the project name. Click it and tour will get open.
 - For IOS Mobile & iPad :
 - On Mobile/iPad first find & install 3DVista app from the playstore ([Link](#))
 - Install itunes on MAC/Windows PC.
 - Connect mobile/iPad with MAC/Windows PC.
 - Open itunes, select the connected device, open application tab and then open tab of 3DVista.
 - In the file browser unzip the HTML folder and rename it with the project name.
 - Transfer this unzipped folder from file browser to 3DVista Tab in the itunes
 - Disconnect the device and open 3DVista app on mobile/iPad. In the OFFLINE Tab, you can see the project name. Click it and tour will get open.
